The matter was discussed in 130<sup>th</sup> EC meeting held on 7<sup>th</sup> February, 2024. As per EC observation no imports were made against the previous permission so the EC recommended the applicant Committee asked applicant to provide proper justification for not importing any quantity from previous permission. Now the applicant has provided the requisite.

The applicant vide email dated 21<sup>st</sup> February, 2024 submitted that *Mill scale is used in pellet making process to improve Fe% and productivity. Requirement is governed by quality of primary feed (Iron Ore) available in domestic market. We find consistent deterioration in quality of iron ore quality in India. This necessitates blending with higher Fe% material i.e. Mill scale to maintain desired composition in pellets for downstream process of Iron Making. Quality of imported mill scale is superior both in terms of Fe% and cleanliness as compared to material traded in Domestic market. We will continue to buy material from Domestic market and top it up with imports subject to commercial viability of usage of Mill scale. During last permission granted by committee, while we intended to import, by the time permissions came in, Geography which was approved did not have material. So, we couldn't able to import.*

Further, applicant stated that they are committed for the import to maintain the pellet quality. As per the committee deliberations, they would like to seek permission for 2,00,000 MT of Mill Scale import instead of 3,00,000 MT which they have applied.

Accordingly the matter is referred in 131<sup>st</sup> EC.
