The matter was discussed in the 80th meeting of Expert Committee held on 13th and 14th July, 2017 as the applicant had confirmed for presentation with regard to the following:

“The applicant made a strong case for the need of this equipment for their testing work and high cost of the original new equipment. However he could not provide the details of the manufacturer and whether the refurbishing done in 2016 was by the OEM. The applicant also stated that the normal life of such equipment is 15 years and is extended atleast by 8-10 years after refurbishment. The Committee agreed to review the case on receipt of the following information:

- i) The original manufacturer of the equipment and whether the refurbishment was done by OEM;
- ii) In case the equipment becomes non-functional within 5 years, an undertaking from the supplier or the principal of the company in the US to take it back.

The matter was deferred by the Committee as the applicant did not attend the meeting.

The applicant has now confirmed for the presentation.

The matter was last discussed in the 78th meeting of Expert Committee held on 11th and 12th May, 2017 and the Committee recommended the following:

“The Committee noted that the proposal is for importing used/waste electronic equipment and assemblies and export them back after dismantling. The Committee noted that import of waste electronic assemblies and scrap is prohibited as per Sch. VI of HW Rules, 2016. Since all the dismantled items are proposed to be exported back, this import may not attract the provisions of Sch VI. The representative of the applicant who came for discussion could not explain the capabilities and the facilities available with them for carrying out the dismantling and whether any processing will also be carried out. The Committee therefore suggested that the applicant may submit evidence of their capabilities through video presentation of operations being carried out in their facilities”.

Now the applicant has confirmed for presentation.
