The matter was discussed in 144th EC, Based on the information and details submitted by the applicant, the EC after deliberation on the proposal recommended import of 64,496 MT of Lead Scrap/ Battery Scrap (as per ISRI Code:Rains/ Rails/ Rink/ Radio/ Racks/ Relay/ Ropes/ Rents/ Rakes) (B1020), Rink and Rains with not more than 2% of liquid/electrolyte by weight in a given lot/consignment/container) (A1160). Further, the above quantity may be granted after submission of site visit report by CPCB stating compliance of SOP without referring the application to the EC. Further, the quantity of import of RINK will be limited to 50% of the total import quantity recommended. The import of RINK & RAINS (A1160) is allowed subject to the Prior Informed Consent (PIC) of the exporting country.

*CPCB site visit report has been received in the Ministry. As per the CPCB inspection, report unit is complying with SOP. However, from the CPCB site visit report, it has been observed that the CA Certificate attached with the inspection report and provided by the applicant while making application has discrepancies. The CA Certificate attached with CPCB inspection report indicates that **38,613.271 MT** of indigenous raw material was procured and the manufactured quantity was **21,885.757 MT** in FY 2024 - 25. However, CA certificate provided with application indicates **96,744 MT** production in FY 2024-25 and on that basis eligible import quantity was calculated and recommended by EC in its 144th meeting.*

Therefore, the matter is again placed before EC for deliberation/discussion.
