The previous permission was given for the import of 3,101 MT of Used Rubber Tyre/Tube Scrap *vide* letter dated 03rd June, 2025. The site visit was conducted by CPCB on 07th February, 2023.

The matter was discussed in 158th Meeting of Expert Committee (EC) held on 18th August, 2026, based on the information/details submitted by the applicant, the EC after deliberation on the proposal, recommended clarification from the applicant regarding the procurement of raw material and low value addition in case of GST. EC also recommend the site visit report by CPCB. Till than the matter is deferred.

Now, the applicant has clarified that its recycling unit processes used/waste tyres through mechanical operations, converting them into crumb rubber products and scrap steel without inducing any chemical changes. It has submitted that the value addition remains limited due to the nature of the mechanical process and the prevailing market prices of the finished products, which are subject to fluctuations in demand. The applicant has further stated that it incurs expenditure on raw material procurement, transportation, electricity, fuel and machinery maintenance, on which GST is paid, resulting in the accumulation of substantial Input Tax Credit (ITC). According to the applicant, the accumulated ITC offsets most of its output GST liability, resulting in a comparatively low net GST liability

In view of the above, the matter is placed before the Expert Committee for consideration and further recommendations.

2.13. M/s Majestique Carbon LLP, Pune, Maharashtra, (F. No. 23/54/2024-HSM)

The previous permission was given for the import of 1500 MT of Used Rubber Tyre/Tube Scrap *vide* letter dated 19th June, 2024. The site visit was conducted by CPCB on 06th October, 2023, and 03rd November, 2023.

The matter was discussed in 158th Meeting of Expert Committee (EC) held on 18th August, 2026, based on the information/details submitted by the applicant, the EC observed that the Gross GST paid by the applicant appears to be disproportionately high in comparison to the reported production during FY 2025 - 26. Further, applicant was also not present in the meeting to furnish requisite clarification regarding the same. Therefore, EC after deliberation on the proposal recommended that the applicant be asked to submit the requisite clarification. Till then the matter is deferred.

Now, the applicant has clarified that its recycling unit processes old/used rubber tyre scrap into Recovered Carbon Black (RCB), Crumb Rubber and Crumb Rubber Powder. The applicant has stated that its specialised products, particularly RCB, are high-value products in demand in the industry, which, according to the applicant, accounts for the comparatively high Gross GST liability in relation to the reported production during FY 2025–26. The applicant has requested that its clarification be considered favourably and that permission to import old/used rubber tyre scrap be granted at the earliest.

Accordingly, the matter is placed before the EC for consideration of the clarification submitted by the applicant and further recommendations.

4.9 M/s Stern Imaging Solutions India Private Limited, Madurai, Tamil Nadu (New Application)

The application (App ID-SW0281087142-M014_D001_A304-1781177831438) pertains to import of 13 Nos of Refurbished/Used medical equipment [CT-9, MRI-1, Cathlab-3] (B1110). The applicant has furnished Form 5, justification for import, acknowledgement for receipt of copy of application from concerned State Pollution Control Board (SPCB)/Pollution Control Committee (PCC). As per CE certificate issued by exporting country *viz* Japan, the manufacturing year is 2021-2023 and residual life is 08-10 years.

The matter was discussed in 159th EC held on 28th September, 2026 Based on the information and details submitted by the applicant, the EC after deliberation on the proposal noted that the items imported will be purchased by Cyrix Healthcare Private Limited and hence EC opined that a clarification may be sought from applicant that whether Cyrix Healthcare Private Limited is operating hospitals/diagnostic centres and intends to use the imported equipment for its own use, or whether the equipment is intended to be purchased for further resale to other hospitals, clinics, etc., which is not permissible. Further, applicant was also not present in the meeting to furnish requisite clarification regarding the same. Therefore, EC recommended that the applicant be asked to submit the requisite clarification. Till then the matter is deferred.

The applicant has submitted letters dated 16.10.2026, 17.10.2026 and 19.10.2026 from M/s Santhya Speciality Hospital, M/s Sun-Shine Scan Centre and M/s Sreenagar Diagnostics, respectively, expressing their intent to purchase the medical equipment for their own use at their respective healthcare facilities. Earlier, the applicant had indicated that the equipment would be purchased by M/s Cyrix Healthcare Private Limited. Accordingly, the applicant has now furnished details of the intended purchasers and their proposed use of the equipment. The matter is, therefore, placed before the EC for consideration and appropriate recommendation.

4.10 M/s Sasha Health Care, Medchal, Telangana (F.No.23/43/2026-HSM).

The application (App ID-SW0265355986-M014_D001_A304-1780576554576) pertains to import of 34 Nos [MRI – 11, CT- 8, Mammography - 3, BMD - 3, X-ray- 4, Cath Lab - 5].

The matter was discussed in 158th EC held on the 18th August, 2026, based on the information and details submitted by the applicant *viz* Chartered Engineer's certificate, latest Quality Assurance report, Maintenance & Break down history, De-installation Report/ Decommissioning report, the EC after deliberation on the proposal recommended import of 31 Nos [MRI – 11, CT- 5, Mammography – 3, BMD – 3, X-ray– 4, Cath Lab - 5], with minimum residual life of 7-10 years for re-use purpose and not to be re-exported back, subject to the

condition that these equipment will be disposed after the end of life as per the prevailing Hazardous and Other Wastes (Management & Transboundary Movement) Rules, 2016 and E-Waste (Management) Rules, 2022 as amended from time to time. Further, EC recommended that applicants seeking fresh permission for import of used/refurbished HEHV medical equipment shall submit Quality Assurance (QA) Reports for all such equipment imported by them prior to 31st May, 2024.

However, while processing the file, it is noted that as per the Form-5, the applicant has sought permission for import of 34 Nos [MRI – 11, CT- 8, Mammography – 3, BMD – 3, X-ray– 4, Cath Lab - 5] (B1110). The applicant has furnished an equipment-wise list of 34 Nos. of equipment. However, on perusal of the said list, it is observed that list contains the MRI-11 Nos., CT- 12Nos., Cathlab-5 Nos., BMD-3 nos., Mammography-3 Nos. and No **X-ray machine** is mentioned in the said list. Further, the Chartered Engineer's Certificates/reports furnished by the applicant also do not mention any X-ray machine. The submitted reports contain details of the MRI, CT, Cath Lab, BMD and Mammography equipment only. Thus, there is a discrepancy between the equipment-wise details furnished by the applicant.

Thereafter, the applicant was requested to furnish the requisite details/documents. subsequently applicant has submitted the revised Form 5 and stated that the as the X-Ray machines are not part of our present import proposal and proposed for only MRI-11 Nos., CT-12Nos., Cathlab-5 Nos., BMD-3 nos., Mammography-3 Nos. applicant has already submitted the related documents.

The matter is, therefore, placed before the EC for consideration and appropriate recommendation.

4.11 M/s Yagya Technology, Ghaziabad, Uttar Pradesh (F. No. 23/101/2024-HSMD)

The applicant has requested an extension of six months in the validity of the NOC issued vide letter dated 22.05.2025 for import of 01 Unit of refurbished/used medical equipment (MRI system) (B1110) for reuse purposes and not for re-export. The applicant has cited geopolitical disruptions and international supply chain delays, particularly regional tensions involving Iran, Israel and the USA, as reasons for the anticipated delay in shipment, transit and clearance of the equipment. The existing NOC is valid up to 21.11.2026, and the applicant has requested an extension to complete the import process. The matter is, therefore, placed before the EC for consideration and appropriate recommendation.

The matter was discussed in the 156th EC Meeting held on 29.05.2026. The EC, after deliberation, rejected the application on the ground that the applicant had not obtained the requisite authorization under the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, as amended from time to time. Accordingly, the applicant was advised to apply afresh after obtaining the requisite authorization from the Rajasthan State Pollution Control Board (RSPCB).

The applicant has now submitted a fresh application without obtaining the requisite authorization. In this regard, the applicant has submitted an undertaking stating that it is engaged in trading of spent catalytic converters and extracts ceramic ash powder containing platinum, palladium and rhodium from used catalytic converters. The applicant has contended that, being a trader, it only extracts ceramic ash powder as the end product and, therefore, separate authorization under the HOWM Rules, 2016, is not required, as clarified by the concerned State Pollution Control Board (SPCB). The applicant has also submitted an acknowledgement from the RSPCB in this regard. The matter is, therefore, placed before the EC for consideration and appropriate recommendation.
